
SATURDAY 20 JUNE 2026

A water leak appeared and its source was not found

Took part **4**
Run by aikyam space

Where aikyam space, Fort Kochi

We noticed a water leak in the space this morning. It didn't stop the day's activities, but it reminded us that keeping the place in good condition is hard. We checked it out, but we couldn't find where the leak was coming from. We're still keeping an eye on it and trying to find a way to stop it from getting worse.
