Our first sustainable frame is ready

Facilitators	3	Club	Others
Run by	aikyam space, Shabana K H, Shemeer Babu and Vivek V	Facilitated by	Shabana K H, Shemeer Babu and Vivek V

Input

What went in

Weeks of research on wood and backing materials, sample frames from local carpenters, and Mr.Jacob's work using reused wood and recycled or recyclable parts.

Activity

Today Mr.Jacob delivered our final frame, and we're really happy. All the research, shop visits and samples have come together in one finished piece.

We kept to our sustainability values the whole way through. Every part of the frame, from the wood to the hanging pin, is either recycled or recyclable. The first frame holds the Preamble to the Constitution of India.

Production

Outcome

Our first finished frame, holding the Preamble to the Constitution of India. We now have a frame that matches both our design and our values. Every part of it is either recycled or recyclable.

Learnings

Making something sustainable takes time, because every small part needs checking, not just the main material. Working with a local maker who understands our values made it possible to keep to them right through to the finished frame.
