Working out packaging for our frames

Run by aikyam space

Steps
Today we visited local dealers to work out how to pack our frames. A frame needs protection on every side. The packing uses different materials, and we need a different vendor for each one.

Materials
We visited local dealers. We talked about how to pack the frames. We asked the outer box vendor and the honeycomb sheet vendor for samples and prices.

Evidence
We have a sample outer box for the frames.

Learnings
Packing a frame safely takes more than one material. Each one can mean a different vendor.

What we would do differently
Next, we will visit the honeycomb sheet vendor.
